Eco area

Let us turn an area of your facility over to wildlife and create an ecological space where nature can thrive undisturbed.

Create a Wellbeing area

where your employees can have a beautiful place to relax!

And here's how:

1. Locate a **5m by 5m** area within your site to develop into your eco area. We are on hand to advise you the best location. Please note, **any size area can be worked with**, larger or smaller!
2. Discuss with us any of our **optional extras to add to your Eco Area Package** to really enhance your green space.
3. We will provide a **free proposal and quotation**.
4. Let us do the hard work and then you can **enjoy your new ecological area**, promoting biodiversity and a healthy ecosystem for your wildlife.

BIODIVERSITY

What will the package include?

ECO SYSTEMS

1. **Wildflower Area:** We will prepare the area and sow wildflower seeds.
2. **A Bug Hotel:** installed in the chosen area. This is a great way to create an entire mini ecosystem providing a helping hand for insects and pollenating creatures.
3. **Maintenance:** All follow up maintenance will be undertaken by our operatives during scheduled visits.
4. **Planting starts:** Oct/Nov 2023

optional extras:
Why not enhance your area further!

- **Picnic Bench:** Provide somewhere for employees to sit in a relaxing area where they can enjoy nature during break times.
- **Additional Naturalised Planting:** We can supply, install and maintain additional planting to your area. A Silver Birch tree or trees planted alongside the wild flowers are extremely good for wildlife, offering environmental benefits through all seasons. Let us recommend a scheme for you.
- **Bird Table or Bird Feeder:** These are ideal to sit alongside wildflower areas to attract different bird species. These offer supplemented food at difficult times of the year when food is scarce. (**Bird feed not included).
- **Plaque:** Would you like to dedicate your area to someone special - we can supply and instal a plaque.

How do I get my bug hotel & eco area?

Call direct or email us, and we'll arrange for a site survey at your convenience to discuss your specific requirements. We'll then provide you with a report with recommendations and a free quotation based on your individual needs..
